GLOBAL LIVE

Mobile CCTV Streaming with GPS Location and 2-Way Comms

Everyone's protected with high quality live video

Commercial vehicle theft and the hijack of valuable cargo cost UK businesses £52 million in 2010 according to TruckPol. Whilst vehicles fitted with CCTV recorders can help secure convictions if the criminal is caught, the latest high quality live CCTV images, GPS positioning and two-way communication from Global Live could prevent the crime in the first place.

Real-time images from cameras mounted in and around the vehicle, monitored at the Cobra Independent Monitoring Centre can enable the Police to deal with the situation as it happens, avoiding the significant costs associated with the aftermath of a crime.

The facts revealed about false claims

Fraudulent claims by third parties against the owners and operators of commercial vehicles can cost a business thousands of pounds and hundreds of hours of staff time each year. Instant playback and two-way communication with the driver can immediately establish the facts and stop this type of fraud before it starts.

Caught in the act

Theft by employees of fuel and other company assets is disruptive and costly to a business. High quality live CCTV images monitored at the Independent Monitoring Centre can stop these issues quickly by providing evidence to identify the individuals involved.

Real time reaction to incidents

Managing the scene of an incident, whether it's a blue light emergency or a profit-draining spillage, requires accurate on-site intelligence to allow the most appropriate resources to be used. High quality live CCTV images of the environment at the scene, enable the emergency response team on-site to focus on the situation and the operators to co-ordinate the response.

Cut the cost of accidents

Accidents involving vehicles and operators can cost a company the difference between profit and loss for the year, as well as the consequent impact on its reputation with other customers. High quality live CCTV images with instant playback enable businesses to act swiftly and effectively in these circumstances to minimise costs, whilst gathering material for staff training and management of Health and Safety issues.

CUSTOMER BENEFITS

Global Live provides high quality, CCTV images of your vehicles, assets and employees streamed through a bespoke system in real time via low cost 3G networks.

The system can provide instant playback or later review. When combined with Global Live Monitoring it is an end to end security solution that protects your staff, your assets and your reputation

- An economically viable system to see where your vehicles and cargo are 24/7 with live video monitoring and GPS location.
- Enables you to react immediately to events and to intervene in real time to protect your staff and company assets.
- Improves the health and safety protection of your staff by enabling live monitoring of their working environment.
- Can reduce or prevent fraudulent claims against the company by providing video and audio evidence.
- Provides information and evidence to assist with staff training and development.
- Saves business cost by removing the need for other mobile phones, vehicle location and voice communication systems.
- Can be integrated with some existing camera systems to upgrade your existing CCTV to high quality, live streaming.
- The potential to reduce staff costs by facilitating single operator working of equipment, when monitored by live CCTV with GPS location and two-way voice communication.

PRODUCT RANGE

In-vehicle cameras, two-way communication, GPS location, high quality live video streaming with hard drive recorder - and including optimised installation by trained industry experts

2 Camera System

2 x mini ball cameras, Push To Talk mic/speaker, remote panic or In-Vehicle panic control, cables & accessories.

Video management system includes 3G data communication module and 16Gb SD card storage with simultaneous playback and recording - up to 28 days storage capacity.

- Ground breaking high quality streaming technology
- Two way communication
- GPS Location
- Anti-shock vibration
- Provides operator + one other location protection
- Ideal for cars, taxis etc
- Wi-Fi for passengers/operators

4 Camera System

4 x mini ball cameras, Push To Talk mic/speaker, remote panic or In-Vehicle panic control, alarm input/output sensors, cables & accessories.

Video management system includes 3G data communication module with simultaneous playback and recording, 250Gb hard drive and in excess of 28 days recording capacity.

As above plus:

- Four camera locations protected
- Includes alarm sensors
- Ideal for vans, minibuses and delivery vehicles

Multi Camera and Bespoke Systems

HGV application includes cab interior, immediate road vicinity, trailer, cargo and load area protection. Can also control cargo door access and monitor the fuel tank.

PSV application protects all aspects of a large PSV and can be extended to 8 cameras, 16 cameras or more. System includes Wi-Fi facility for passengers and operators.

Options Include

- Remote access control of cargo areas
- Personal attack alarm
- In cab screen

GLOBAL LIVE MONITORING

24/7 protection for your staff, your assets and your reputation

The optimum security solution combining high quality live CCTV images, GPS location and two way communication with trained operators used to dealing with duress situations.

Security Industry Association qualified staff approved to talk directly with the Police enabling the most effective crisis response.
