

GLOBAL LIVE MONITORING

24/7 protection for your staff, your assets and your reputation

The optimum security solution combining high quality live CCTV images, GPS location and two way communication with trained operators used to dealing with duress situations.

Security Industry Association qualified staff approved to talk directly with the Police enabling the most effective crisis response and support for your driver.

Law enforcement experience of the monitoring operators means they can assist with and prepare cases for court.

Independent Monitoring Centre with fail over support provides peace of mind and is trusted by the world's leading brands.

Experienced operators, independent from the businesses they protect, removes any conflict of interest with the staff and assets they are watching.

An end to end solution without any headcount or staffing issues for you which can be scaled up to provide more services if required including:

- Driver verification and welfare checks
- Live alert responses
- Recorded evidence reporting
- Vehicle immobilisation
- Surveillance
- Security guarding
- Active monitoring
- Personal attack alarm

Global Live is powered by **Cobra (GLpC)**, the licensed UK distributor for SerVision live CCTV technology. **GLpC** is the partnership between **Cobra UK** and **Global Vehicle Systems** to deliver this world class live CCTV solution.

About Cobra

A pioneer of vehicle electronic solutions and at the forefront of vehicle security, safety and telematics technology, Cobra has been providing vehicle manufacturers with tried and tested products for line-fit and aftermarket installation since the 1970s and has a global network of 40 commercial partners.

Cobra's products include Cobra Alarms and Immobilisers, Cobra Parking Sensors, CobraTrak Stolen Vehicle Tracking, ROSEN In-car DVD systems, NSV Bluetooth® Handsfree Systems (compatible with all Bluetooth® enabled handsets), Rear View Reversing Cameras and Monitors, Cruise Control and Speed Limiters. Cobra provides a range of telematics solutions to fleets, vehicle manufacturers, logistics providers and insurance companies. Cobra already provides a telematics solution for the Coverbox pay as you drive insurance policy, and the Co-Operative is using it to power its Young Driver Insurance.

About Global Vehicle Systems

The Global Vehicle Systems team has over 20 years of combined expertise in the vehicle security & surveillance industry, working in partnership with UK & European Police intelligence services to combat the most sophisticated vehicle crimes.

GVS works with some of the world's most prestigious manufacturers of security, surveillance and safety systems and has the expertise to design bespoke systems to meet the demands of today's vehicle operators. It is the mission of GVS to create and deliver customer driven, world class mobile security and surveillance solutions.

GLOBAL LIVE

Live Mobile CCTV Security Systems

GLOBAL LIVE

Mobile CCTV Streaming with GPS Location and 2-Way Comms

Everyone's protected with high quality live video

The widespread use of CCTV by bus and coach operators has had a dramatic effect on crime reduction according to Passenger Focus. In some UK regions up to 70% of vehicles have CCTV on board and this investment has contributed to a 74% reduction in criminal damage and provided reassurance to passengers.

But whilst CCTV recordings can help secure convictions if the criminal is caught, the latest high quality live CCTV images, GPS positioning and two-way communication from Global Live could prevent the crime in the first place.

Real-time images from cameras mounted in and around the vehicle, monitored at the Independent Monitoring Centre can enable the Police to deal with the situation as it happens, avoiding the significant costs associated with the aftermath of a crime.

Cut the cost of accidents

Accidents involving buses and coaches can cost a company the difference between profit and loss on a route for the year, as well as the consequent impact on its reputation.

Forward facing cameras on coaches now provide high quality live CCTV images with instant playback enabling operators to act swiftly and effectively in these circumstances to minimise costs, whilst gathering material for staff training and management of Health and Safety issues.

The facts revealed about false claims

Fraudulent claims by third parties against bus operators can run into thousands of pounds and hundreds of hours of staff time each year. Global Live's instant playback and two-way communication with the driver can immediately establish the facts and stop this type of fraud before it starts.

Caught in the act

Theft by employees of fuel and other company assets is disruptive and costly to a business. High quality live CCTV images monitored at the Independent Monitoring Centre can stop these issues quickly by providing evidence to identify the individuals involved.

Connected with your Passengers

The live streaming 3G technology used by Global Live can also provide passengers with a secure Wi-Fi connection.

CUSTOMER BENEFITS

Global Live provides high quality CCTV images of your vehicles, employees and passengers streamed through a bespoke system in real time via low cost 3G networks

The system can provide instant playback or later review. When combined with Global Live Monitoring it is an end to end security solution that also adds value to the passenger journey

- An economically viable system with low operating costs to protect your staff and passengers 24/7 with live video monitoring and GPS location.
- Enables you to react immediately to events and intervene in real time to support your staff in the event of an accident or attack.
- Improves the health and safety protection of your staff and passengers by enabling live monitoring of their working environment.
- Can reduce or prevent fraudulent claims against the company by providing video and audio evidence.
- Provides information and evidence to assist with staff training and development.
- Saves business cost by removing the need for other mobile phones, vehicle location and voice communication systems.
- Can be integrated with some existing camera systems to upgrade your existing CCTV to high quality, live streaming.
- Enhances your passengers' experience with secure Wi-Fi functionality.

PRODUCT RANGE

In-vehicle cameras, two-way communication, GPS location, high quality live video streaming with hard drive recorder, secure Wi-Fi for passengers - including optimised installation by trained industry experts
